

ECONSULT CORPORATION

Tabatha A. Lupinetti, B.S.

Tabatha Lupinetti is a Vice President of Econsult Corporation. Since joining Econsult in 1997, her work has focused on two areas: data analysis/statistical computing and human resource management consulting.

The majority of her work has involved the creation of project databases with a focus on financial, econometric and statistical analysis. Ms. Lupinetti is involved in research design, data measurement including the collection and statistical analysis of those data, as well as the reporting of findings for client presentations and expert reports. Much of her work has focused on equal employment opportunity litigation, which often requires developing a thorough understanding of data systems maintained by employers. She has extensive experience adapting data assembled by others to the needs of Econsult projects in litigation and other areas.

Ms. Lupinetti also has extensive experience as a consultant on human resource management issues in both the public and private sectors including engagements by the Pennsylvania Convention Center, the Administrative Office of the Pennsylvania Courts, the First Judicial District of Pennsylvania, and a number of private employers. Her work in this area focuses on the identification, data collection and analysis of appropriate metrics to assess the financial, service and quality outcomes of human resources.

Prior to her association with Econsult, Ms. Lupinetti was Director of CATI (Computer Assisted Telephone Interviewing) Programming at Response Analysis Corporation, a market research firm, where she supervised a staff of programmers responsible for survey programming, sampling, coding and analysis.

Ms. Lupinetti has a complete knowledge of analytical software including statistical and data analysis programs such as SAS, STATA, and SPSS.

Ms. Lupinetti earned a B.S. degree in Computer Information Systems, from The College of New Jersey.
